1000 Hours	All items in 500 program PLUS Change inner and outer air filters Change chain case oil Change hydraulic oil Check coolant, add conditioner	\$210
	Engine valve lash adjustment on 200 series and earlier is recommended	\$70

We will contact you after we have inspected your machine and will review any recommended service work.

Maintaining your equipment according to this maintenance schedule will insure reliable performance, protection of your investment and avoidance of costly down-time.

JOHN DEERE

We have identified the critical components of your skid steer that require maintenance and inspection. This package offers you peace of mind, knowing that your machine has been serviced completely by one of our experienced, John Deere trained technicians.

For an extra charge, we can dispatch a technician and perform this work on site, without much down time. Or we can arrange to have the unit hauled into our shop. We have rental units available too!

Call any of our service departments today and schedule your skid steer service and avoid unplanned down time tomorrow!
